USER ROLES

Authentication

Required before all other calls

Step 1 — Login to receive a JWT token:

```
POST /api/auth/login
Body: { "email": "user@baseoils.com", "password": "Password@123" }
Response: { "token": "eyJ...", "expiry": "...", "user": { "roles": ["Admin"] } }
```

Step 2 — Attach token to every subsequent request header:

```
Authorization: Bearer <token>
```

GET /api/auth/profile — Returns current user's info and roles from the JWT.

Dashboard

Home screen KPIs

FEATURE	METHOD	ENDPOINT	RESPONSE FIELDS
Today Sales + Monthly Sales Amount & invoice count for today and current month	GET	/api/dashboard	todaySalesAmount, todaySalesCount monthlySalesAmount, monthlySalesCount
Outstanding Receivables Total unpaid balance across all customers	GET	/api/dashboard	outstandingReceivables
Pending Payments (Payables) Total amount owed to vendors	GET	/api/dashboard	pendingPayables
Low Stock Alerts Count of warehouse SKUs below threshold	GET	/api/dashboard	lowStockAlertCount
Top Selling Products Top 5 products this month by revenue	GET	/api/dashboard	topSellingProducts[] → productGrade, totalQty, totalAmount
Recent Invoices Last 10 sales invoices across all customers	GET	/api/dashboard	recentInvoices[] → id, invoiceNumber, customerName, amount

Sales Summary

Date-range sales analytics

FEATURE	METHOD	ENDPOINT	NOTES
Today / Weekly / Monthly Sales Pass date range to filter	GET	<code>/api/reports/sales-summary</code> <code>?fromDate=2025-05-03&toDate=2025-05-03</code>	Returns per-customer breakdown with invoice count, sub-total, tax, total, paid, balance
Invoice Count Number of invoices in the period	GET	<code>/api/dashboard</code>	<code>monthlySalesCount</code> in dashboard response
Top Customers Sort sales-summary by totalAmount desc	GET	<code>/api/reports/sales-summary</code>	Already returns ordered by total amount descending
Payment Received Today Receipts collected on a specific date	GET	<code>/api/payments/received</code> <code>?fromDate=2025-05-03&toDate=2025-05-03</code>	Returns list with receiptNumber, customerName, invoiceNumber, amount, paymentMode

Stock Overview

Warehouse & tank inventory

FEATURE	METHOD	ENDPOINT	NOTES
Available Stock — Packaged Warehouse SKU quantities (top items)	GET	<code>/api/reports/warehouse-stock</code> <code>?warehouseId=1</code> (optional)	Returns warehouse, SKU, quantity, last movement date
Available Stock — Bulk Tanks Tank stock levels in litres and MT	GET	<code>/api/reports/tank-stock</code>	Returns currentStockLiters, fillPercentage, stockInMT per tank
Consolidated Stock Bulk + packaged combined view	GET	<code>/api/reports/consolidated-stock</code>	Grouped by product grade — bulkStockLiters + packagedStockQty
Low Stock / Out of Stock Alerts Items at or below qty threshold	GET	<code>/api/reports/low-stock</code> <code>?threshold=10</code> (default: 10)	Returns SKU name, warehouse, pack size, current qty — ordered low-first
Fast Moving Products Products ranked by qty sold in last N days	GET	<code>/api/reports/fast-moving</code> <code>?days=30&top=10</code>	Returns productGrade, SKUName, totalQtySold, totalRevenue, invoiceCount

Customer Data

Customer directory & profile

FEATURE	METHOD	ENDPOINT	NOTES
Customer List (Name, Phone) Full directory for search & select	GET	/api/customers	Returns id, name, code, phone, email, address, GSTNumber, state
Customer Mobile Summary Outstanding, overdue, last purchase date	GET	/api/customers/{id}/mobile-summary	Returns outstandingAmount, overdueAmount, lastPurchaseDate, lastInvoiceNumber, totalLifetimePurchases
Customer Full Ledger All invoices, payments, credit notes	GET	/api/ledger/customer/{id} ?fromDate=&toDate= (optional)	Returns date, type, refNumber, debit, credit, runningBalance
Quick Call / WhatsApp Button Frontend action using phone from customer list	—	No API needed — use phone field from /api/customers	Use tel:{phone} or wa.me/{phone} in the app
Collect Payment Option Record payment against a customer's invoice	POST	/api/payments	Body: invoiceId, amount, paymentMode, paymentDate, reference

Payments

Receipts, collections & overdue

FEATURE	METHOD	ENDPOINT	NOTES
Received Today All payments collected on a given date	GET	/api/payments/received ?fromDate=2025-05-03&toDate=2025-05-03	Returns receiptNumber, customerName, invoiceNumber, amount, paymentMode
Pending Collections Customers with unpaid balances	GET	/api/payments/pending	Ordered by oldest due date first. Returns totalOutstanding, oldestOutstandingDays, isOverdue
Overdue Customers Customers past their due date	GET	/api/payments/pending	Filter isOverdue: true from the response client-side
Mark as Paid / Quick Payment Entry Record a receipt against an invoice	POST	/api/payments	Body: { invoiceId, amount, paymentMode, paymentDate, reference, remarks }
Accounts Summary Total receivables vs payables net position	GET	/api/reports/accounts-summary ?fromDate=&toDate= <i>Admin / Manager only</i>	Returns totalReceivables, totalPayables, netPosition

Orders / Dispatch

Sales order lifecycle & delivery status

FEATURE	METHOD	ENDPOINT	NOTES
Pending Orders Confirmed orders awaiting dispatch	GET	<code>/api/sales-orders</code> <code>?status=Confirmed</code>	Returns SONumber, customerName, totalAmount, expectedDeliveryDate, deliveredPercentage
Dispatched Orders Orders in transit	GET	<code>/api/sales-orders</code> <code>?status=Dispatched</code>	Valid status values: Draft, Confirmed, Dispatched, Delivered, Cancelled
Delivery Status Full order detail with line delivery progress	GET	<code>/api/sales-orders/{id}</code>	Returns lines with qty vs deliveredQty, linked delivery notes with status
Sales Invoice Detail Invoice lines, taxes, receipts for a sale	GET	<code>/api/sales-invoices/{id}</code>	Returns full invoice: lines, CGSTAmount, SGSTAmount, IGSTAmount, paymentReceipts
All Invoices (filtered) Browse invoices with date & status filter	GET	<code>/api/sales-invoices</code> <code>?fromDate=&toDate=&paymentStatus=Unpaid</code>	paymentStatus: Unpaid, PartiallyPaid, Paid

Reports (Light)

Summary-level reports for mobile

FEATURE	METHOD	ENDPOINT	NOTES
Sales Report Summary Grouped by customer, any date range	GET	<code>/api/reports/sales-summary</code> <code>?fromDate=&toDate=</code>	invoiceCount, subTotal, taxAmount, totalAmount, paidAmount, balanceAmount per customer
Product Sales Report Sales by product grade / SKU	GET	<code>/api/reports/product-sales</code> <code>?fromDate=&toDate=</code>	Returns totalQuantity and totalAmount per product grade/SKU/delivery type
Profit Estimate Revenue minus purchase cost	GET	<code>/api/reports/net-profit</code> <code>?fromDate=&toDate=</code>  Admin / Manager only	Returns totalRevenue, totalPurchaseCost, netProfit
Expense Summary Supplier payments grouped by vendor	GET	<code>/api/reports/expense-summary</code> <code>?fromDate=&toDate=</code>	Returns vendorName, paymentCount, totalPaid — ordered by highest spend

Alerts & Notifications

Real-time in-app alerts

FEATURE	METHOD	ENDPOINT	NOTES
All Notifications Payment reminders, low stock, new order alerts	GET	<code>/api/notifications</code> <code>?page=1&pageSize=20</code>	Returns unreadCount + items[] with title, message, type, timeAgo, isRead, linkUrl
Unread Count (badge) Number to show on notification bell icon	GET	<code>/api/notifications/unread-count</code>	Returns { unreadCount: 5 }
Mark Notification as Read Dismiss a single notification	POST	<code>/api/notifications/{id}/read</code>	No body required
Mark All as Read Clear all unread notifications	POST	<code>/api/notifications/read-all</code>	No body required
Low Stock Alert Detail List of specific SKUs triggering the alert	GET	<code>/api/reports/low-stock</code> <code>?threshold=10</code>	Drill-down from dashboard lowStockAlertCount

User Roles

Role-based access control

ROLE	ACCESS LEVEL	RESTRICTED ENDPOINTS
Admin	Full access to all endpoints	All endpoints including /api/reports/net-profit and /api/reports/accounts-summary
Manager	Full access to all endpoints	Same as Admin — net-profit and accounts-summary allowed
Salesman	Sales, customers, payments, notifications	Cannot access: /api/reports/net-profit, /api/reports/accounts-summary

How roles work: On login, the JWT token contains the user's role(s) in the claims. Read the role from /api/auth/profile → roles[] and conditionally show/hide features in the mobile app UI accordingly.

Not in Mobile App

Desktop ERP only — not exposed via API

- ✗ Full accounting journal entries
- ✗ Bulk data editing / import
- ✗ User & role management
- ✗ Packaging / production orders
- ✗ Tally sync configuration
- ✗ GST filing & tax setup
- ✗ Balance Sheet & P&L reports
- ✗ Chart of accounts setup
- ✗ Master data creation (products, tanks)
- ✗ GRN / Supplier invoice creation
